Dear Tania and John:

First let me apologize for the delay in giving you and your staff their proper kudos for all the hard work put into designing our new website.

From the beginning of our collaboration, I was pleased with the ease of your conveying and equaling your understanding of my unsure direction of the changes we were about to make (and are continuing to make). If change can be made easy, your participation and guidance made it all that and more. You both were able to assist in making continual and ever evolving changes that much easier, while being a delight to work with.

Secondly, I would be happy to recommend your services to any individual or company that would like my opinion.

As always, I will rely on your ability to continue to construct our website in a very "classy" site while making it easy to navigate.

Sincerely,

A handwritten signature in black ink that reads "Cathy B. Gayon". The signature is written in a cursive, flowing style.

Cathy B. Gayon
